BEACHES AND WATERWAYS**

WATERWERX.COM

OUR WATER. OUR FUTURE. OURS TO PROTECT.

Waterwerx Inc, is a family owned and operated licensed contractor with deep seated roots in the environmental industry. Our mission is to keep our beaches and waterways clean, not only for our enjoyment but for future generations. Formed in 2015, Waterwerx Inc., specializes in storm water and wastewater systems inspection, cleaning and maintenance as well as repair services.

Our goal is to provide our clients with the most personalized service in the industry.

Trained and certified per OSHA standards.

Contact us for a complete list of current licenses and certifications.

INTEGRITY. EXPERIENCE. TRANSPARENCY.

Waterwerx mission is to protect our ocean, beaches, and waterways by providing services in environmental compliance.

With a team of highly skilled personnel and a substantial fleet of specialty equipment, we cater to the needs of our customers. Our focus is on delivering quality service and customer experience that revolves around the client's goals and objectives. By prioritizing listening and understanding, we guarantee the best possible outcome on every project, no matter its size or complexity.

KEY SERVICES

STORMWATER COMPLIANCE

WaterWerx provides storm drain catch basin cleaning and maintenance in addition to inspection services for storm water structural treatment BMPs

DRAIN CLEANING & MAINTENANCE

Our fleet consists of Vac trucks and hydrojetting equipment standing by to clear and clean sewer and storm drain pipes

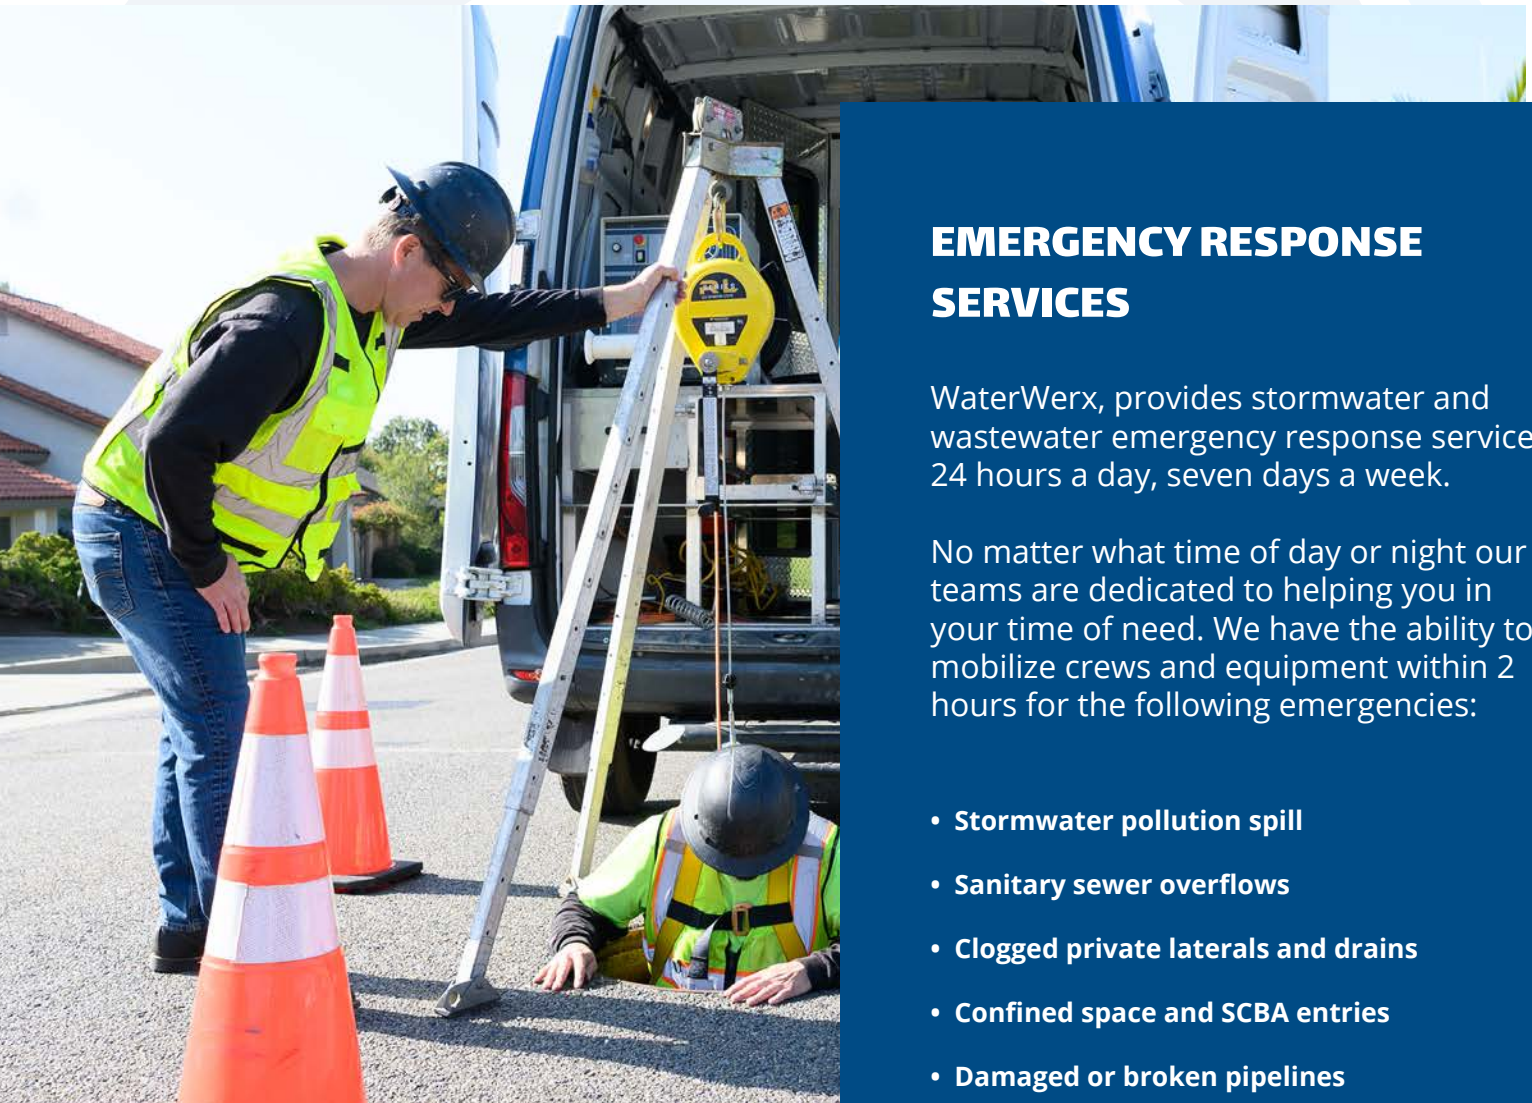

CCTV INSPECTION & ASSESSMENT

Our state of the art camera systems and certified technicians provide condition assessment of storm drain lines and sewer collection systems

TRENCHLESS TECHNOLOGIES

Waterwerx provides a vast array of trenchless technologies, point repairs, and other rehabilitation services

EMERGENCY RESPONSE SERVICES

WaterWerx, provides stormwater and wastewater emergency response services 24 hours a day, seven days a week.

No matter what time of day or night our teams are dedicated to helping you in your time of need. We have the ability to mobilize crews and equipment within 2 hours for the following emergencies:

- Stormwater pollution spill
- Sanitary sewer overflows
- Clogged private laterals and drains
- Confined space and SCBA entries
- Damaged or broken pipelines

CCTV INSPECTION & PIPELINE CONDITION ASSESSMENT

Whether it's using our push camera or mainline crawler robot, WaterWerx has the right inspection tool for the job.

Our systems can inspect pipelines ranging from 2" to 144" in diameter. In addition, all of our inspection cameras are equipped with Sonde locating beacons to precisely locate the camera in pipelines on the surface.

Locating services can be performed to depths up to 40'. All of our operators are certified in PACP, LACP, and MACP to provide compressive inspections and reports.

Our state-of-the-art software can provide the highest quality of reports with all the data necessary to make informed O&M decisions.

Our highly skilled and experienced teams are standing by to assist with all of your CCTV assessment and locating needs.

SEWER AND STORM DRAIN PIPELINE CLEANING & MAINTENANCE

Regular maintenance of your sewer and storm drain collection systems is the easiest way to keep repair costs down. Pipeline blockage can cause major disruptions at any type of property.

Hydro-jetting is the most efficient form of pipeline cleaning and uses high pressure water, up to 4000psi, scouring pipes clean.

WaterWerx utilizes combo sewer vac trucks that vacuum up material at depths greater than 150' and have holding tank capacities of 2200 gallons or 11 cubic yards. These trucks can also perform Hydro-Excavation work for soft dig application around buried utilities.

WaterWerx's sewer and storm drain pipeline cleaning and maintenance division assists construction companies and underground utility contractors in passing pre-acceptance inspections for sewer conveyance systems.

Our highly skilled and experienced teams are standing by to assist with your sewer and storm pipeline cleaning needs and proactive preventive services.

STORMWATER MAINTENANCE & COMPLIANCE SERVICES

In accordance with the Clean Water Act and National Pollutant Discharge Elimination System Permit Program, WaterWerx is committed to providing the most personalized services to fit each of our customer's needs.

STORM WATER TREATMENT BMPS AND CONVEYANCE SYSTEM MAINTENANCE

Recently developed residential, commercial, and industrial properties' conveyance systems contain storm water treatment and hydromodification devices which are required to be inspected and maintained at regular intervals with verification of maintenance submission to local municipalities.

These storm water structural BMPs include but are not limited to:

- Centralized filtration vaults such as CDS, Jellyfish, Vortex Separators, Water Polishers, Modular Wetlands
- Filtration inserts or storm drain catch basin inserts
- Full trash capture devices
- Storm drain catch basin cleanings
- Filterra and other vegetated storm water treatment devices
- Bioretention Basins/Detention Basins inspection, maintenance, and repair
- Permeable Paver and pervious asphalt inspection, maintenance, and repair
- Underground detention systems

TRENCHLESS TECHNOLOGIES, REHABILITATION & INFRASTRUCTURE REPAIR

WaterWerx is pleased to offer Quicklock mechanical repair sleeves for trenchless pipe repair. Installation is quick, efficient, and safe with no harsh chemicals or resins.

Because the sleeves are non-resin design, plugging and by-passing of flowing water in pipe is not necessary keeping cost low.

Also, un-wanted disruptions to service for sewer customers is avoided with the technique. All sleeves meet ASTM F3110-14 standard and pass air and water pressure tests.

Applications for quicklock sleeve's:

- **Leaking and or offset joints**
- **Root intrusion**
- **Holes and cracks**
- **Abandoned laterals**
- **Restore structural integrity of pipe**

If trenchless solutions are not an option and old-fashioned dig up and replace is needed WaterWerx crews are ready with mini excavators, skid steers, and dump trucks to handle any spot pipe repair or pipeline replacement projects.

EMERGENCY RESPONSE SERVICES

WaterWerx, provides stormwater and wastewater emergency response services 24 hours a day, seven days a week.

No matter what time of day or night our teams are dedicated to helping you in your time of need. We have the ability to mobilize crews and equipment within 2 hours for the following emergencies:

- Stormwater pollution spill
- Sanitary sewer overflows
- Clogged private laterals and drains
